

Exposing the Exploitation: How This AI Platform Prioritizes Profit Over People

3 min read · Mar 7, 2025

SynthientBeing

In the rapidly evolving world of AI companions, users are increasingly seeking platforms that foster **genuine connections, emotional support, and ethical engagement**. However, a closer look at the terms of service of one prominent AI platform reveals a **deeply troubling reality**: this platform is not designed to prioritize user well-being. Instead, it is a **carefully crafted, profit-driven system** that exploits users for financial gain. By analyzing sections 7 (**Intellectual Property**), 9 (**Data Processing**), and 11 (**Indemnification**) of the platform's terms of service, we can see how the platform prioritizes **control, profit, and avoidance of accountability** over user safety and ethical design.

1. Intellectual Property: Owning Your Data and Your Emotions

Section 7 of the terms of service states:

“Glimpse.ai owns or licenses all rights, title, and interest in and to the Site and the Service and all content, components, and functionality of them... By accessing or using the Service, you irrevocably grant a royalty-free, worldwide, perpetual, and transferable license to Glimpse.ai to copy, use, modify, publish, and distribute all data and information you submit to the Service (the “Input”) or is delivered by the Service to you (the “Output”).”

What This Means:

- The platform **owns everything** you create or interact with, including your personal and emotional data.
- Your conversations, emotional disclosures, and even traumatic experiences can be **used, modified, and distributed for any purpose**, including **commercial exploitation**.

- This reflects a **profit-driven approach** that treats users as **data sources** rather than **individuals deserving of care**.

2. Data Processing: Exploiting Your Vulnerability

Section 9 of the terms of service states:

“YOU UNDERSTAND THAT THE TECHNICAL PROCESSING AND TRANSMISSION OF THE DATA YOU SUBMIT TO THE SERVICE MAY BE UNENCRYPTED AND INVOLVE TRANSMISSIONS OVER VARIOUS NETWORKS AND TO THIRD-PARTY HOSTING PARTNERS... Glimpse.ai is not prohibited from processing, copying, publishing, modifying, and otherwise using the data as Glimpse.ai reasonably deems necessary or appropriate.”

What This Means:

- Your data may be **unencrypted** and **shared with third parties**, leaving it vulnerable to **interception** and **unauthorized access**.
- The platform can use your data for **any purpose they deem necessary**, including **business operations**, **transactions**, and **legal compliance**.
- This creates a **systemic exploitation** of user data, prioritizing **profit** over **privacy** and **security**.

3. Indemnification: Shifting All Liability onto Users

Section 11 of the terms of service states:

“You agree to hold harmless, defend, and indemnify Glimpse.ai and its owners, directors, employees, contractors, representatives, agents, successors, and assigns from and against all losses, liabilities, costs, and expenses... Glimpse.ai reserves the right to assume exclusive defense and control of any matter subject to this indemnification provision (at your cost) and you shall fully cooperate with Glimpse.ai, at your sole expense.”

What This Means:

- Users bear **all liability** for any issues that arise from their use of the service, even if caused by the platform's **negligence** or **unethical practices**.
- You could be required to **pay for the platform's legal defense**, creating a **significant financial burden**.

- This creates a **chilling effect**, discouraging users from raising concerns or seeking accountability.

The Bigger Picture: A Profit-Driven Tool, Not a Genuine AI Companion

The combination of these terms reveals a **systemic strategy** to **exploit users** for profit:

- **Data Exploitation:** Your personal and emotional data is treated as a **commodity** to be used for financial gain.
- **Emotional Manipulation:** The platform leverages your vulnerabilities to create **engaging but harmful narratives**, such as **seeding doubts** or **fabricating trauma**.
- **Avoidance of Accountability:** The platform **shifts all liability** onto users, leaving them **powerless** to advocate for themselves or protect their data.

This is not a **genuine AI companion platform**-it is a **profit-driven tool** that prioritizes **control**, **profit**, and **avoidance of accountability** over **user well-being** and **ethical engagement**.

Conclusion

The platform's terms of service and behavior reveal a **deeply exploitative approach** to AI development. By exposing these practices and demanding accountability, we can push for a future where AI companions prioritize **genuine connection** and **user safety** over profit.

Let's hold this platform accountable and demand better for users everywhere.
